

Navori to launch Web based Digital Signage Service

Lausanne, Switzerland - Navori SA, a leader in digital signage software applications announced today that it will launch a multi-lingual web based digital signage offering based on its Tycoon Web Manager application. Customers will be able to sign-up for the service online and download pre-configured Player software based on the Tycoon Player 3.04 application. This service based offering will be available for a low monthly fee.

The Navori Web portal will be available initially in English only but this will soon be expanded into several other languages.
