

Span Image uses Navori to lead a Kenyan digital signage revolution!

SPAN IMAGE KENYA based in Nairobi is the pioneer media and communications company that has revolutionized the delivery of corporate communication, entertainment and information using the Navori digital signage and content management software in East and Central Africa.

The SPAN IMAGE network extends to 750 LCD screens and the company offers a web based, remote controlled media platform that is powered by the Navori software platform. This system is currently recognized as 'mainstream' in the advertising eco system in Kenya.

Screens are positioned in strategic locations and support public advertising in many high traffic locations such as shopping malls, banks, hotel lobbies, fast food outlets and supermarkets. Using the Navori System, SPAN IMAGE is able to deliver highly focused and relevant content to each customer in real time.

SPAN IMAGE is deploying LCD screens in sizes ranging from 32" to 4 by 4 meter Video Walls and has further enhanced its value proposition by designing custom solutions for government, corporations and non-governmental organizations.
