TAKE YOUR SCREEN-BASED COMMUNICATIONS TO THE NEXT LEVEL WITH NAVORI

BOUTIQUE FILM LEVERAGES NAVORI TECHNOLOGY TO POWER LCD SCREENS IN THE SWISS ALPS

Through strategic partnerships, Boutique Film has created the largest profitable digital signage booking platform in Switzerland.

This approach offers simplicity for their clients and the opportunity to launch national and regional advertising campaigns quickly and efficiently.

Networks of screens are strategically located so as to guarantee a viewing experience that is unique, both in quality and visibility.

Video based ads offered on these screens are seen exclusively by the top echelons of society, who are predominantly high income earners and corporate decision makers.

The most powerful mode of communication in Switzerland, now available under one roof.

The company does not only provide advertising space in strategic locations, they also manage screen networks in two exclusive Swiss Mountain resorts: Gstaad and Crans-Montana. The Crans-Montana screens are installed in high visibility area such as ticket counters and lift queues.

Using Navori Server Enterprise and Navori Web Manager, Boutique Film can assign specific access rights depending on the user's login profile. For example, some users are given full rights so they can manage all content and update

Players while others may have access restricted to local content or be prevented from publishing updates without prior authorization.

This is a very useful feature that lets each customer retain control of their content while a Boutique Film administrator oversees the entire digital signage network.

The Navori software's ease of use and reliability lets Boutique Film offer their clients an impeccable level of service using cutting edge technology.

The company also appreciates the fact Navori is a self-hosted solution which means they are not dependent on a third party operator to run their network.
