

## Navori releases Microsoft Vista compatible version of its flagship Tycoon Digital Signage Software platform

Lausanne, Switzerland – October 23, 2008 – Navori SA released today the Microsoft Vista compatible version of its Tycoon Digital Signage Software Platform. This move makes Tycoon available to Vista users via a common software installer.

This will provide greater flexibility as end users will now be able to deploy Tycoon in mixed environments (with some Tycoon applications installed on XP Pro and others on Vista).

Users wishing to try out Tycoon on Vista can download the installers from the company's extranet site. Simply visit [www.navori.com](http://www.navori.com) and log in to access the new installers from the download menu.
